PROJECT PURPOSE, SCOPE, AND OBJECTIVES			
<i>Purpose:</i> RecreoHub is your ultimate destination for effortless movie bookings, personalized coffee orders, sports scheduling, and exciting games—crafted to deliver unparalleled convenience and memorable experiences, all while optimizing service management. <i>Scope:</i> 1. Cinema House. 2. Coffee Shop. 3. In-Door Games. 4. Games. <i>Objectives:</i> 1. To provide a seamless and intuitive platform for customers to book, purchase, or participate in recreational activities. 2. To enhance operational efficiency for staff by automating booking, billing, and scheduling processes. 3. To improve customer experience by offering clear information about services and real-time updates on availability. 4. To support administrative tasks, such as revenue tracking, resource allocation, and reporting. <i>Additional objectives:</i> 1. To integrate customizable features like promotional offers, discounts, or loyalty rewards. 2. To include feedback mechanisms for continuous improvement of services.			

PROJECT DESCRIPTION (most important part)

In this project, **RecreoHub**, we will be managing and integrating the following key modules:

1. **Cinema House:**
 - Display a list of available movies, including showtimes, genres, and prices.
 - Facilitate ticket bookings, movie reservations, and generate bills for customers.
 - Manage seat availability for each show and ensure real-time updates for the users.
2. **Coffee Shop:**
 - Present a menu of coffees and available add-ons/toppings.
 - Process customer orders, calculate prices, and generate bills automatically.
 - Allow customers to customize their orders with toppings, enhancing the personalization of their experience.
3. **In-Door Games:**
 - Provide access to various in-door games, such as bowling, pool, table tennis, or arcade games.
 - Allow customers to book and schedule their game sessions, providing details like timing, available equipment, and pricing.
 - Manage reservations for each game station to ensure availability and avoid conflicts.
 - Provide an intuitive interface for customers to select and pay for their games and services.
 - (More games could be added or remove according to the decision of our group)
4. **Games:**
 - Provide customers with access to games such as Hangman. (More games will be added)
 - Create an interactive and engaging interface to facilitate gaming sessions.
5. **File Handling:**
 - Manage and store data related to bookings, orders, sports schedules, and game sessions securely.
 - Ensure proper file handling techniques to keep customer and administrative data organized and easily accessible.

This system will facilitate accurate administrative tasks, reduce time spent on manual processes, and ensure a seamless experience for both customers and staff. The centralization of these modules within **RecreoHub** will save resources for the institution, enhancing operational efficiency while delivering high-quality services.

NOTE: More features to the module could be added accordingly with mutual consent of our team. In case of any changes, it will be informed to with file along with the project on submission date. Names of modules could vary but the functionality would be the same.
